OLIGOTHERAPY

Oligotherapy uses small doses of individual trace minerals for therapeutic support, supplementing the necessary minerals for enzymatic functions. Oligotherapy remedies are considered to be catalysts that speed up metabolism at the cellular level. They provide essential nutrition to stop free radical activity which destroys bodily tissue. Oligotherapy supplementation is believed to enhance the movement of ions, essential for life, into and out of the cells. The origins of Oligotherapy come from the research done by Bertrand at the Pasture Institute and subsequently continued by Jacques Menetrier, M.D. in 1944.

4 dram vial with #35 pellets. One dose daily.

In trace element form these minerals are less than 100 ppm. Dosage is once daily.

Aluminum (Al) Aluminum is of particular value in all problems associated to the brain such as mental sluggishness, attention deficit, memory and retention of information, as well as with difficulty getting to sleep and nocturnal agitation.

Antimony (Sb) Osteoarthritis, arthritis, bronchitis, chronic head colds, prostate problems, acute rheumatism,

Barium (Ba) A transformative agent on the internal cellular environment. High blood pressure.
Bismuth (Bi) Angina, sore throats.

Bismuth-Lead-Tin (BiPbTn) Used in the treatment of syphilis and cancer. Plays a role in numerous bio-electric functions.

Boron (B) Osteoporosis, menopause difficulties. Contraindicated in cases of rheumatoid arthritis. Plays a role in bone and muscle development. Stimulates cerebral function and mental alertness. Helps metabolize calcium, phosphorus, copper, magnesium, and vitamin D in the fixation of calcium. Plays a role in the secretion of estrogen and testosterone.

Cesium (Cs) Supports the body's immune system, regulates cardiac rhythm.

Chromium (Cr) Metabolizes sugar carbohydrates, flatulence, atherosclerosis, heart diseases and growth defects. Essential for activating insulin release, glucose uptake and cell storage. Treats anxiety and fatigue.

Cobalt (Co) Cobalt is valuable in cases of headaches, migraines, vasomotor disorders, vertigo and tinnitus. This is due to the sympathicolytic effect that Cobalt exerts on vascular receptors. As well, interestingly, Cobalt has a regulating influence on stomach and bowel receptors.

Copper (Cu) Acute infections. Copper possesses powerful
anti-viral and anti-bacterial properties and as such, is very potent when used to combat any type of viral or bacterial infection. Copper is also a potentiator of antibiotic therapy and is therefore recommended as an adjunct. Finally, Copper exerts a very interesting anti-ulcerous action on the mucous membranes; i.e. mouth and stomach ulcers. Good for general fatigue, osteoporosis, hair loss, chronic inflammatory rheumatism.

Copper-Gold-Silver (CuAuAg) Adrenal dysfunctions, pessimism, depressive states. Combine with gemmotherapy liver and kidney detox regimes.

Copper-Iron-Manganese (CuFeMn) Treatment in weight loss, preventing fatigue, irritability, sleepiness.

Fluorine (F) Osteoporosis, Teeth and gum problems, Dental Support, calcium absorption by tone tissue; useful during menopause. Scoliosis, Paget's disease, fractures, decalcification.

Germanium (Ge) Improves cellular oxygenation, supports the body's immune system, helps eliminate toxins from the body. Indicated for the treatment of rheumatoid polyarthritis, hypercholesterolemia, candidiasis, chronic viral infections, cancer, AIDS.

Gold (Au) for fighting infections, wound healing, tissue reconstruction and immune stimulation. Supports cardiovascular system. Indicated for the treatment of
infectious diseases; measles, meningitis, typhus, septicemia. Fever, Rheumatoid inflammation, high blood pressure.

Iodine (I) Hyperthyroid dysfunctions, fatigue, obesity, poor mental function, breasts cysts, high or low blood pressure, lowered fertility.

Iron (Fe) Anemia, irregular menstruation, fatigue, arthritic pain, inflammatory pain, depression, sterility, hair loss, fragile bones, soft nails, celiac disease, crohn's disease, AIDS.

Lead (Pb) for pre cancerous states to help restore the body's cellular environment. Acts as an enzymatic inhibitor. For neoplasia, syphilis, cancer.

Lithium (Li) Psychosomatic diseases; anxiety, hyper emotiveness, insomnia, nervous breakdowns, lack of will, psychic disorders, arterial hypertension, obesity, cellulitis, blood vessels and nerves disorders associated with menopause, instability, irritability, aggressiveness, unsettlement, personality and behaviour dysfunctions in children or elders, inhibitions, inadaptability at work or in the family, etc. Also for treatment of some dermatosis and rheumatisms.

Lithium-aluminum (LiAl) Manic depressive psychosis.

Magnesium (Mg) Inflammatory Bowel Disease, Digestion,
indigestion, Joint Pain, Rheumatoid Arthritis, Rheumatism, Muscle Spasms.

Magnesium-Cobalt (MgCo) Digestive and intestinal disorders, constipation, colitis.

Manganese (Mn) Allergies, Arthritis, Fatigue, Headache, Migraine, Inflammation, Rheumatoid Arthritis, Sinusitis, Sinus Infection, Thyroid Disorders, Respiratory Problems.

Manganese-Cobalt (MnCo) Arterial hypotension, tachycardia, angina pectoris (with phosphorus), Dystonia of autonomic nerves, gastritis, hypercolesterolemia.

Manganese-Copper (MnCu) For common colds, influenza, bronchitis, pleurisy, hay fever. Targeted at the ear, nose, and throat. Basic treatment remedy for hypo reactive syndrome as well as for preventive treatment of recurring infectious and allergic disorders, especially those affecting the ear, nose and throat.

Manganese-Copper-Cobalt (Mn-Cu-Co) Inflammatory disorders. Bone and collagen formation. Colitis, gastritis, acne, anemia, periodontal disease, decalcification and hypothyroidism.

Molybdenum (Mb) Plays essential role in synthesis of proteins, metabolizing iron and nitrogen. Helps maintain a healthy nervous system. Indicated in the treatment of gingivitis, mouth ulcers, impotence, cancer.
Nickel (Ni) A cofactor for enzymes dealing with the metabolism and storage of sugars and lipids in the liver. Known as a hypotensive factor and a heart modulator, as it cancels the effects of adrenaline in the body. Indicated in the treatment for obesity, diabetes, liver, pancreas and spleen ailments, neoplasia.

Nickel-Cobalt (NiCo) Colibacillosis

Osmium (Os) Helps maintain balance in the sympathetic nervous system. Indicated for nervous disorders, stress, panic attacks.

Platinum (Pt) Acts as an adjunct to cancer treatments, especially radiation therapy. Indicated cancer treatments, diabetes.

Rubidium (Rb) Used in high Ph therapy and to decrease tumor growth. Muscle pain, multiple sclerosis, tetany, spasmophilia.
Selenium (Se) Muscular and cutaneous afflictions. Slows the ageing process, destroys free radicals, protects from cancer, combats chemo side effects, protects the liver and pancreas. Indicated in the treatment of cancer, AIDS, cancerous tissue, macular degeneration, retinopathy, cataracts, prostate problems.

Selenium-Copper (SeCu) neoplasm; tumor growth

Silicon (Si) Strengthens bones, helpful in certain skin conditions, premature aging, loss of concentration and memory, prostate problems, hypertension, high cholesterol, warts.

Silver (Ag) A wide-range bactericide that is very helpful in all infectious diseases. It calms down fevers and allows the disease person to recover. The trilogy of copper-gold-silver behave like natural antibiotic. Indicated in the treatment of infection, septicemia, ulcers, inflammation, cystitis.

Silver-Bismuth (AgBi) Angina

Silver-Selenium (AgSe) Pneumonia

Silver-Tin (AgTn) Staphylococcia

Strontium (Sr) Indicated for the treatment of osteoporosis. Supports bone resistance, prevents tooth
Decay.

Sulphur (Su) For healthy skin and joints. For the treatment of acne, hypercolesterolemia. Allergies, eczema. arthritis, rheumatism, osteoarthritis, migraines, hepatic insufficiency.

Tin (Tn) Acts as an anti-infectant, supports body's immune system, encourages hair growth, prevents deafness, improves reflexes. Indicated in the treatment of Abscesses, boils, anthrax, cancer, syphilis.

Tin-Copper (Tn-Cu) Staphylococci

Vanadium (V) Fixation of calcium, memory loss, stabilizes blood sugar levels, complementary to any weight loss program. Also used in the treatment of non insulin dependent diabetes, difficulty with kidney function, impotence, sterility.

Zinc (Zn) Hair loss, acne and psoriasis, loss of sensorial abilities (taste, smell) and also early cataracts. Zinc shows a mainly endocrine tropism, with a direct action upon the pituitary gland. Also indicated in the treatment of depression, acne, crohn's disease, peptic ulcers, fatigue, poor night vision, white spots on the nails, loss of memory.

Zinc-Copper (Zn-Cu) Menstrual and menopausal problems. Endometriosis, enuresis, fibroma.
Zinc-Nickel-Copper (Zn-Ni-Cu) For psoriasis, impotence, pancreatic problems stomach ulcers, gastritis
